曾百中 主席 香港建築業物料聯會

I am taking up the Chairmanship at a challenging juncture for Hong Kong economy, as we are badly hit by the Covid-19 pandemic together with the political and social upheaval which has been impacting our business and polarizing our society. Under these circumstances, I see that it is my role to unite and foster the relationship of all of our members in order to ride out the adversities facing our construction materials industry.

A strong HKCMA is essential to ensure that our members' voices are heard by the Government and public at large and this is perhaps even more important during difficult times. At a time of social unrest and serious health scares, getting our messages across will require a great deal of intellectual honesty, courage and expertise drawn from our diverse and talented members. To steer our way forward, I am prepared to listen to our members' ideas and suggestions and implement strategy and direction to the best interest of our members on a fair and impartial manner.

During my two years of service, my key aspirations are to set our short-term, medium-term and long-term objectives to make sure our Association is heading the right direction and maintain a sustainable growth. One of the short-term goals is to embark on this E-Bulletin and we plan to have it released every quarter to report on our past activities and also show you our upcoming events.

Another short-term goal is to organize technical seminars and plant visits for our members to participate. Our Industry needs advanced technology and innovation in order to grow and I am sure that these activities will help bringing in new ideas and elevating our professionalism.

In the meantime, I assure you that our members' views and concerns will be reflected and we will endeavor to make sure both our Industry and our frontline workers are getting the most during this coronavirus period.

I have every confidence that the clouds will go away and the sun will shine on us again!

行政總裁的話 CHIEF EXECUTIVE'S MESSAGE

2020年在對本港、全區域及全球均是具挑戰性的一年。本港的整體經濟及包括建築和相關行業在內的主要支柱產業都無可避免經歷最艱難的時刻,情況更遜2003年爆發非典型肺炎疫情的時候。而不幸中的大幸是,2019冠狀病毒病對建築物料等不及其他行業大。自疫情爆發以來,我便與發展局等業議會和立法會工程界功能界別緊密商討可給予建造業務會和立法會工程界功能界別緊密商討可給予建造出資助,以紓緩業界困境。在發展局的大力支持下,查會員以勞工輸防疫抗疫基金涵蓋建築物料供應商,使本會過程公司得以受惠,憑有效會藉及香港商業登記證即可獲高等取得以受惠,憑有效會藉及香港商業登記證即可獲高等取得以受惠,憑有效會藉及香港商業登記證即可獲高等取得以受惠,憑有效會藉及香港商業登記證即有與所有其

值得一提的是,從內地入口的碎石、沙、鋼筋、混合化學物等原材料供應曾因廣東省在疫情初期封關而受阻,但自2020年4月起,隨著內地復工,原材料供應鏈亦逐漸恢復正常。

工,包括司機、物流後勤和相關承辦商,以改善他們的生計。

本會必定全力以赴,繼續為本會會員促進本港建築物料業長足發展。我藉此由 衷心感激相關政府部門、建造業議會和立法會工程界功能界別一直以來對建築物料業的支持和關注,亦多謝本 會會員和相關機構在這艱難時刻互諒互讓。

即使前路荊棘滿途,只要我們攜手合力,定可闖過難關。你們一各位會員,一直是我的動力來源。

雷漢崇

行政總裁 香港建築業物料聯會

The start of year 2020 has never been easy, be it locally, regionally & globally and in fact, HK overall economy and key pillar industries including our construction and related sectors have inevitably experienced most difficult distressful times, even worse than the woeful nightmare during SARS epidemic dated back year 2003. Quite fortunately, the resultant COVID-19 impact on our materials industry has been purportedly not that significant compared with other hard hit industries. Ever since virulent outbreak of the pandemic, I have started closely liaising with HKSARG DEVB, CIC and legCO Functional Constituency (Engineering) towards firming up series of relief funding programs to alleviate our stricken construction industry. Most encouragingly, I am immensely delighted to see that, given bolstering support from DEVB, the recently approved AEF 2.0 (anti epidemic relief funding scheme) is thoughtfully expanded to cover materials suppliers represented by HKCMA as benefactors, up-to HKD 20K per HKCMA member company with valid membership status and H.K. BR. Though we are about to see gradual stabilisation on the prevailing crisis, HKCMA is now actively working with HKSARG towards pursuing successive stage of industry relief funding impetus (AEF 3.0). Objective and underpinning spirit of this is to benefit our materials suppliers' workforce including drivers, logistics transport personnel and related contractors whose livelihood has also been adversely affected by the predicament.

Lastly, I opine it is also noteworthy that our key materials supply(原材料)and importation from mainland has once been materially impeded by the business operations closure in Guangdong province during start of pandemic. These key materials include aggregate, sand, steel and mixing chemicals etc. It is great to see that the said materials supply chain has gradually been normalised after major Chinese enterprises have resumed businesses by start of April 2020.

Though HKCMA will continue our ongoing best endeavours to strive for our well being and sustainable development of H.K. materials industry for our member companies' best interests, I would like to take this excellent opportunity to wholeheartedly thank related government departments, CIC, LegCO Functional Constituency - Engineering for their continued support and up close concern for our materials industry. Of course, I feel obliged to thank all HKCMA members and related supporting communities for their forbearance and ongoing support amid the difficult times.

For our industry we strive, through collaboration we excel in facing upcoming ever increasing challenges. Honestly, you all as HKCMA members always remain my pride and good reason for my passion.

防疫抗疫基金「一筆過補貼」- 貨車 ONE-OFF SUBSIDY FOR GOODS VEHICLES UNDER ANTI-EPIDEMIC FUND

為協助運輸業界應對當前經濟環境所帶來的經營壓力,政府在「防疫抗疫基金」下向業界提供的一筆過補貼,每位合資格的貨車登記車主可獲每輛車一筆過港幣一萬元的非實報實銷補貼。另外,政府會承擔跨境貨車司機在深圳及珠海共五個陸路口岸(分別是沙頭角、文錦渡、皇崗、深圳灣口岸及港珠澳大橋珠海口岸)進行新冠病毒核酸檢測的相關費用。如跨境貨車司機在本港進行核酸檢測,亦可以實報實銷方式申請資助,金額上限為每次港幣三百五十元。

To assist the transport trades in coping with the operating pressure in the current economic environment, the Government announced the details of the one-off subsidy to the transport trades under the Anti-epidemic Fund. A one-off non-accountable subsidy of \$10,000 will be provided to each eligible registered owner of a goods vehicle(s) for each goods vehicle. Furthermore, the Government will bear the cost of nucleic acid tests for cross-boundary goods vehicle drivers at five land-based ports in Shenzhen and Zhuhai (namely Sha Tau Kok, Man Kam To, Huanggang, Shenzhen Bay Port and Hong Kong-Zhuhai-Macao Bridge Zhuhai Port). Cross-boundary goods vehicle drivers who conduct nucleic acid tests in Hong Kong can apply for the subsidy on an accountable basis and the maximum amount is \$350 per test. 新冠肺炎疫情下的石材短缺危機 Aggregate Shortage Crisis under COVID-19 impact

物料供應穩定為建築發展重要 為一環,當中包括碎石的設施,本 港現時僅餘一個位於藍地的碎石 場,不能自給自足,供應主要來自 內地。據了解, 政府正聯同業界研 究在青衣西部的鑊底灣設置一個碎 石設施,以增加本港各類碎石的供 應。由於青衣區內現時已有混凝土 和預裝鋼筋的生產工廠,業界盼可 帶動青衣進一步成為建築物料生產 集中地。

增加本港碎石製作

生產混凝土和瀝青需要源源不 絕的碎石, 而本港過去的碎石供 應,除了依靠內地供應,同時亦於 本地生產,包括安達臣道石礦場及 屯門藍地石礦場,均同時設有碎石

設施。不過,數年前安達臣道石礦 場完成「歷史任務」交還政府建屋 後,就一直未有其他礦場填補。

甯漢崇透露,政府正聯同業界 研究在青衣西部的鑊底灣,增建一 個碎石場,以增加本港碎石製作的 地方。他表示,由於該用地附近 一帶仍未發展,沒有通道往返市 中心, 因此預料日後將依靠水路運 輸,石材由水路運往該用地,然後 壓碎成不同大少的石塊, 然後運往 建築工地,有助避免過於依賴內地 的情況。

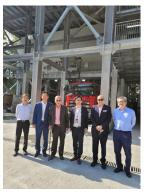

由於附近混凝土廠眾多,他説 該計畫現獲得不少混凝土廠的支 持,期望日後在近建的碎石廠進行 「揼石仔」工作後,可在附近的廠房 生產混凝土等工作,減省時間及運 輸成本,同時亦可提升生產量,帶 動青衣日後成為建築物料製作中

窗藻崇又指,本港慣常使用的 碎石共有十多款, 現時主要先在內 地弄碎後,才運往香港,惟由於本 港建築地盤眾多,加上需要多款不 同大細的碎石,以應付不同類型的 建築項目,若果於本港增加碎石設 施,將有助建築業界按自己需要將 石塊鑿成不同大細,致物料供應更 為穩妥。

鋼筋預製委員會 Reinforcement Processing Solution Committee (RPSC)

鋼筋預製委員會(RPSC)是香港建築業物料聯會有限公司 (HKCMA) 其中一個主要產品委員會。委員會由在香港從事生產鋼筋預製產品的公司會員組成。主要成員包括香港上市公司及設在香港,在鋼筋預製產品在全球居領導地位的公司。現時委員會成員轄下有4間成功獲土木工程拓展署 (CEDD) 認可的鋼筋預製產品工場,分別位於屯門、青衣及大埔,為香港公營及私人建築工程項目提供服務。

RPSC於2016年成立,從開始至今,一直在建築材料供應行業發揮重要作用。尤其是透過與HKIE(香港工程師學會),HKIS(香港測量師學會),HKCA(香港建造商會),DEVB(發展局)和CIC(建造業議會)等主要機構合作,舉辦多類型建造業界項目/活動/會議/研討會/參觀。近期一個成功的推介活動是在2019年9月3日與DEVB及CIC合作關於應用BIM(建築資訊模型)在預製鋼筋的聯合技術講座,RPSC成功向與會人士介紹自動化預製鋼筋工場的運作,同時展示一個採用BIM技術拆圖及預製鋼筋的真實案例。

2019年9月3日DEVB及CIC舉辦聯合技術講座的團體照 Group Photo taken at the 3-9-2019 Joint Technical Talk organized by DEVB & CIC

RPSC近年間達到多項關鍵成就。我們成功說服政府當局接受香港使用DBIC(盤卷螺紋鋼筋): 說服CEDD(土木工程拓展署)委派IAT(獨立監察組)監管認可鋼筋預製產品工場,在工場內安排鋼筋取樣測試; 説服CIC在CITF(創新及科技基金)內包括鋼筋預製產品工場的產品; 説服DEVB在工務局工程內選出24個試點項目,指定試用CEDD認可鋼筋預製產品工場的預製鋼筋工法; 倡議將香港鋼筋形狀代碼(shape code) 標準化; 建議CIC考核CEDD認可鋼筋預製產品工場的培訓計劃,及考慮接受為CIC認可培訓課程。

During the years, RPSC has critical successes in making the authorities to accept the use of debar-in-coil (DBIC), CEDD's provision of Independent Audit Team (IAT) in a prefabrication yard, rebar sampling and testing arrangement for prefabrication yard, CIC's Construction Innovation & Technology Fund (CITF) to include products from prefabrication yard, DEVB's 24 pilot projects selected from works departments mandating the use of off-site rebar cut and bend from CEDD's approved yards, the idea of shape code standardization in HK as well as CIC's consideration of recognizing the training program in prefabrication yard.

Reinforcement Processing Solution Committee (RPSC) is one of the core product committee of HKCMA. Its member companies include publicly listed companies and global leaders in rebar prefabrication in HK. There are currently 4 existing rebar fabrication yards approved by CEDD serving the public and private construction sites. The plants are located in Tuen Mun, Tsing Yi and Tai Po.

Since the formation of RPSC in 2016, RPSC members have been playing an important role in the construction material supply industry through various construction events/functions/ meetings/seminars/visits in recent years mainly held by many key organizations such as HKIE, HKIS, HKCA, DEVB and CIC. It is worth to mention the most recent successful presentation namely Joint Technical Talk related to BIM application in rebar organized by DEVB & CIC on 3-9-2019. RPSC managed to introduce the operation of automated prefabrication yards and demonstrate real HK cases of using BIM technology for rebar detailing and prefabrication.

For aggregate, HKCMA related product committee has ever since been closely liaising with CEDD SCCT towards pursuing product certification for aggregate materials in accordance with government's standing specification and workability requirements. Necessary preparatory works and processes are actively underway and hopefully, certification for aggregate will become materialised soon across our industry.

On local quarrying, CEDD and their appointed consultants have been engaging us on potential future quarrying site territory wide search in Hong Kong. Along with the proposed quarrying site, HKSARG is also planning to carry out large scale coastal reclamation projects somewhere in Lung Ku Tang. HKCMA is immensely pleased to assist DEVB and collaboratively promote this for best interests of general public and sustainable development of H.K. construction materials industry and related sectors.
