在本會的努力下，並經諮詢市場主要持份者後，鋼筋預製委員會經已成立，廣納鋼筋業界頂尖人才。委員會的使命是將現行的鋼筋處理工序，轉為更具成本效益、更可善用人力資源及更安全的預製模式。自動化及無縫物流也是鋼筋預製的一大特點。

此外，本會首次舉辦各個核心產品領域的可持續及職安健獎，旨在宣揚職安健及鼓勵良好作業，以推進本港建築業物料業界的革新和發展。

### HR/Education/ Training Committee officially established

It is encouraging to see that HR/Education/Training Committee under HKCMA regime has been officially established comprising Human Resources heads and experts from market leading materials suppliers. Primary objective and prioritized action of this committee is to liaise closely with relevant governmental departments such as Labor Welfare Bureau and related organization like Construction Industry Council on current issues of industry's concern. Predominantly, these issues include but not limited to recruitment of young generation laborer, staff retention, wage/benefits benchmarking and occupational health safety etc.

Constant ongoing dialogue with HKSAR government are to be maintained for well-being and safety of HK construction material industry and related sectors.

With enormous efforts and consultation among key stakeholders in market, the Rebar Processing Solutions Committee (RPSC) is officially formed consisting of top notch market leading players in reinforced steel bar, cut and bend industry. Ultimate mission/vision is to convert from existing on site Rebar Processing to offsite Rebar Processing which is proven to be a more cost, labor efficient and safer sustainable concept. Another distinct feature of this

off site solution is definitely its automated end to end seamless logistics solution.

For the very first time, HKCMA is going to organize the industry wide Sustainability, Health Safety awards across the core product spectrum. Underlying spirit of this excellence award is to inculcate health safety and promulgate best trade practice sharing for overall well-being and innovation of HK construction material industry.
